RESEARCH PROJECTS

Funded

- **Faroe Islands Digitalization Study (PhD School Grant) (Grant Writer and Primary Researcher)** 2018
This was a thirty-day funded research trip to the Faroe Islands to study their current digitalization effort. The trip included over 20 interviews, direct involvement with the digitalization teams, participation in meetings, and consultation on Open Government Data initiatives. The project was funded by: ASTRA “ITÜ arenguprogramm aastateks 2016-2022” Doctoral School in Economics and Innovation Project code: 2014-2020.4.01.16-0032
- **Estonian Digital Governance Stakeholder Mapping (Internal University) (Grant Writer)** 2018
The stakeholder analysis will identify, analyse, map, and prioritize the active stakeholders in Estonian e-Government. In addition to understanding the stakeholders involved in Estonian e-Governance, this project aims to create a more complete picture of Estonian e-Governance: how it was initiated, how it developed, where it is today, and where it will be in the future.
- **OpenGovIntelligence (H2020) (Participant)** 2016-2019
The OpenGovIntelligence project aims at stimulating sustainable economic growth in Europe through fostering innovation in society and enterprises. Towards this end, OpenGovIntelligence suggests a holistic approach for the modernization of Public Administration (PA) by exploiting Linked Open Statistical Data (LOSD) technologies. This includes new business processes, policies, and tools that will enable the active participation of the society and enterprises in data sharing and in the co-production of innovative data-driven public services.
